PILGRIM TECHNOLOGY LLC - WIFI

Pilgrim Technology has expanded coverage of WiFi Hot Spots throughout Midland. Installed now are Hot Spots Downtown Midland from M-20 to Ace Hardware on Main Street, Northwest Midland with access to some apartment complex and business users, Midland County Fairgrounds, Fairview Plaza and the Midland Community Center. The Midland Community Center, Fair Grounds and Fairview plaza are all recent additions to the expanding Wireless network which supports mobile Laptop users that want access to the Internet and E-Mail. Coverage however has stalled in places like the Midland Mall and the airport (MBS). The company (Pilgrim Technology) has been unable to workout mutually beneficial agreements with operators of the Midland Mall and the MBS Airport.

“To continue to expand our coverage in Midland we will need to partner with property owners in other venues, that are willing to offer a high tech service”, said Chief Technology Officer, Jim Pilgrim. “Our goal is to provide wireless (WiFi) access in as many public locations as we can throughout Midland.” The deal for property owners is simple, allow Pilgrim Technology to install their equipment at their cost and share in the revenue. There is no cost to the property owner for the service to be installed.

Pilgrim Technology has partnered with Boingo Wireless to support roaming users that have global Boingo roaming accounts which allows traveling users to access WiFi networks without additional cost throughout the world with over 60,000 hot spot locations. Pilgrim Technology has brought this service to Midland and supports Boingo customers at each location, including the use of the Boingo client software which allows easy access to the Internet. Users that Boingo Wireless accounts do not pay a fee for usage to Pilgrim. Pilgrim will get a roaming fee from Boingo for the usage.

Pilgrim Technology is offering a free wi-fi weekend in September for users throughout their network in support of the cruise-n-car show being held downtown. “We are encouraging customers to come downtown to enjoy the festivities during the car show, and why not bring the lap top if you feel the need to stay connected or check your email”, commented Jill Pilgrim, CEO, Pilgrim Technology.

Pilgrim Technology believes the service being offered will greatly enhance the usability of mobile devices throughout Midland. Jill Pilgrim, CEO of Pilgrim Technology commented, “Our focus on wireless technology and secure wireless solutions will make our network one of the most reliable and secure in the business”. Pilgrim Technology is using experience gained on US Government contracts with wireless technology to improve product and services that are offered in Midland.

About Pilgrim Technology LLC

Pilgrim Technology LLC is a company that is dedicated to technology innovation and customer satisfaction. This dedication opens the doors to create a dynamic experience for employees and customers alike. Formed in 2002, Pilgrim Technology is a woman-
